Preventing and Mitigating Risk in Your Supply Chain
riskmethods empowers businesses to identify, assess and mitigate supply chain risk. By using artificial intelligence, we help customers automate and accelerate threat detection, enabling them to gain competitive advantage with a well-managed approach to meeting customer demands, protecting reputation and reducing total cost of risk.
Turn risk into a competitive advantage.

Help Your Bottom Line
Take advantage of predictive insights that will help you avoid costs by addressing risk before it happens.

Improve Supplier Relationship Management
Make sure you have all the right information at your fingertips to make risk-aware supplier decisions.

Maintain Business Continuity
Respond faster to disruptions with real-time alerts for events that directly affect your own supply chain.

Create Efficiency through Digitization
Be faster, smarter and better by using riskmethods artificial intelligence to automate processes that are beyond human scale.

Enhance Supply Chain Visibility
Easily manage your entire risk exposure with simple risk scores that show you exactly what's going on throughout the different tiers of your supply chain.

Ensure CSR and Compliance
Stay on top of CSR standards and compliance violations to make sure that your brand isn't damaged by a supplier's bad behavior.
The riskmethods Solution
Powered by Risk Intelligence™

The riskmethods Solution provides you with the products and services you need to identify, assess and mitigate risk in your supply chain.

“When our supplier was hit by a fire, riskmethods alerted us 30 hours before the supplier did. Because we acted fast to find an alternative source before market prices increased, we realized a purchasing advantage worth $300,000.”

André Hahn, Stockmeier Group
Preventing and Mitigating Risk in Your Supply Chain

The Intelligent Way to Manage Risk

Our solution is powered by Risk Intelligence™, a technology-driven service that uses artificial intelligence to identify the real risk to your supply chain.

**Risk Intelligence scans millions of sources.**
Media outlets, commercial databases, government databases and more. If there's a risk to your supply chain, you're going to know about it.

**Risk Intelligence finds the signal in the noise.**
Monitoring is only half the battle—you also have to judge what's relevant. Our machine-learning AI engine can pinpoint exactly what matters to your supply chain.

**Risk Intelligence is near real time.**
In risk management, every second counts. riskmethods Risk Intelligence keeps you in the know—in the now.
riskmethods Products

The products in The riskmethods Solution are easy to activate and easy to integrate. Whether you’re a small company just getting started or a large enterprise with a complex landscape, The riskmethods Solution can be seamlessly worked into your business processes.

- Check the health of your entire supply network via dashboards and an interactive world map
- Thanks to AI-driven technology, be the first to know about risk impacting your supply chain
- Receive predictive signals about potential risk spanning broad risk types
- Assess and compare risk scores using both an out-of-the-box and fully customizable scorecard

- Easily assess the criticality of your supply base at the category level
- React to threats quickly and effectively based on an actionable impact profile so you can take timely and appropriate measures when responding to threats
- View your supplier risk portfolio for simplified prevention analysis and category strategy planning

- Rely on plans to help you take immediate, decisive and preventive actions
- Automate workflows and assign user tasks so that everyone knows exactly what to do and when to do it
- Keep a record of risk mitigation activities to show compliance to regulations and standards
- Initiate contact with your business partners (suppliers, customers, own sites) to jointly mitigate risk
