Manage Risks | Reduce Costs | Create Value | Measure Impact

Sustainability Ratings for Global Supply Chains

Actionable Scorecards, Performance Monitoring & Improvement Tools
EcoVadis: Simple, Global, Reliable Ratings

EcoVadis is the most trusted provider of business sustainability ratings, used by over 55,000 companies worldwide. Backed by powerful technology and a global team of experts, EcoVadis’ easy-to-use scorecards provide actionable insights into environmental, social and ethical risks.

Buyers
- Identify risks, drive improvements
- Scale faster, control costs
- Discover innovations
- Reward high performers

Suppliers
- Get a globally recognized rating
- Avoid redundant surveys
- Benchmark performance
- Promote strong results

About the EcoVadis Assessment Model

EcoVadis rates sustainability performance by assessing a company’s policies, actions and results, as well as inputs from third-party professionals and external stakeholders. Our methodology covers seven management indicators, across 21 sustainability criteria, in four themes:
- Environment
- Labor & Human Rights
- Ethics
- Sustainable Procurement

Companies being assessed receive an online questionnaire customized to their industry, country of operations and size.

The EcoVadis Solution
Interactive Platform and End-to-End Services

Interactive Platform:
- Dashboard for network views and KPI tracking
- 360° screening and live news monitoring
- Benchmark performance
- Collaborative corrective action tools

Program Services:
- A program manager guides strategy and campaign deployment
- Supplier onboarding & support services in 10+ languages
- Additional services including risk mapping, buyer training and software integration

Integrating EcoVadis in the Procurement Process

- Include EcoVadis (EV) for all new suppliers as a prerequisite
- Define weighting of EV in general RFP
- Include EV assessment as contract condition
- Include EV in general supplier scorecard, annual review, Corrective Action Mgmt

Onboarding  RFP  Analysis  Awarding  Contract  Ordering  SRM  Risk

- Inform about EV in RFP (pre-) invitation so that suppliers can prepare
- Awarding based on weighting rules
- Block EV high risk suppliers from Ordering tool
- Live News for monitoring between ratings

EcoVadis integrates seamlessly with your existing procurement tools, such as SAP Ariba, Coupa, iValua, Synertrade, Tradeshift, Jaggaer, Resilinc and more.

EcoVadis IQ
Predictive Intelligence for Global Supply Chains
Risk Mapping Solution
Your Challenges

Understanding your sustainability risks at the category and country-level across a large and diverse supply base can be overwhelming. Global supply chains routinely span more than 100 countries with varying laws, regulations and enforcement conditions, and cover more than 200 purchasing categories. This presents a complex model for sustainability risk criteria. Creating a framework, calibrating it to your metrics, keeping it updated, and implementing it as a model to prioritize additional supplier due diligence needs, requires reliable expertise, not to mention bandwidth.

The EcoVadis IQ Solution

EcoVadis IQ is built to profile and map your entire supply base for ethical, social and environmental risk using intelligence from the world’s largest sustainability performance database, as well as your own procurement data. What you get is robust and immediate predictive intelligence to proactively manage risk across all your trading partners and an engine for smarter, more efficient assessment strategy.

How It Works

EcoVadis Inputs

- Inherent risk data
- Deep sustainability expertise
- Ratings performance insights

Your Custom Data

- Supplier information
- Supplier spend
- Supplier criticality

Risk Profiles

An informative profile for each company based on a robust inherent risk model. Optionally combine procurement information to tune risk calculations to your specific context.

IQ Recommendations

A smart recommendation for next steps to take with each company. This helps optimize your assessment and audit strategy to best focus your efforts.

Supply Chain Risk Dashboard

A comprehensive dashboard gives you the meaningful data and sophisticated drill-down capabilities you need for analysis, reporting, and fine-tuning your strategy.

Key Features

Risk Profiles

- Overall risk incorporating your custom procurement data
- Next step recommendation for additional due diligence

Map

- Detailed analytics for easy reporting
- Map your risk across geographies by spend or criticality
- Total supply base visibility

Profile

- Inherent risk based on country and industry

Integration with EcoVadis Ratings

Select top priority suppliers to request an EcoVadis Rating directly from EcoVadis IQ. Also, Scores and Medals of suppliers who have shared their scorecard with you would be displayed in their predictive risk profile.
A Trusted Partner

Over 450 global procurement organizations use EcoVadis to manage sustainability risks in their supply chains, among them:

verizon  
Schneider Electric  
Johnson & Johnson  
SUBWAY  
nielsen  
EASTMAN  

AIRFRANCE  
AVERY DENNISON  
Nestle  
Coca-Cola European Partners  
L’OREAL  
salesforce  

LVMH  

EcoVadis can help you make a quick and accurate mapping of suppliers who are at risk.

NOKIA  

EcoVadis enables us to focus our internal resources on action plans and follow-ups with suppliers identified as potential risks.”

EcoVadis IQ: Speed and Full Coverage With an Unrivaled Dataset

- Risk visibility across entire supply base
- Intelligence from EcoVadis’ robust database
- Fast results - get immediate insights
- Maximize efficiency of assessments

Founded in 2007, EcoVadis has 600 professionals from 50+ nationalities around the world.

60,000+ customers
198+ industries / purchasing categories
155+ countries

A key distinguishing element of EcoVadis’ sustainability monitoring platform is the integration of external inputs to augment company-provided documentation and data sources. Laws and regulations such as FCPA in the US, Sapin II and the UK Bribery Act have made companies even more liable for knowing about sustainability infractions, yet the information is difficult to uncover, anticipate, and manage on your own.

EcoVadis 360° Watch Findings and Live News together provide the essential intelligence and monitoring inputs, both during and between assessments:

360° Watch Findings comprise the 360° Management Indicator of the EcoVadis methodology and help collect stakeholder inputs that may impact a company’s score. 360° Watch Findings combine Artificial Intelligence with human analysis to identify the most relevant stories within the past five years, both positive and negative, collected from over 100,000 public sources (listed below).

This is augmented by data from the Global Regulatory Information Database (GRID™) through a partnership with Regulatory Datacorp. 360° Watch Findings are analyzed and integrated as part of the EcoVadis Rating, and are displayed in the scorecard.

It has never been more critical for companies to stay up to date for quick response to any violations and negative NGO and press coverage. In between assessments, stories related to your trading partners’ sustainability performance continue to be gathered in the form of Live News.

Powered by the same smart engine as 360° Watch Findings, Live News stories are automatically reviewed and verified by EcoVadis analysts. Live News does not impact the current rating of a company. However, when a company is reassessed, archived Live News is used to complement 360° Watch Findings.
All news curation is identified via more than 100,000 data sources. The news watch, curation, and validation processes are driven by a combination of EcoVadis’ proprietary Artificial Intelligence-based sustainability news analysis engine, combined with curation and validation by CSR experts for top quality.

[Data Sources (Select Examples From 100,000+ Sources)]
